### Strategic planning

We help you plan, coordinate, and administer your election during each phase of the electoral process by developing a mutually beneficial partnership based on trust, communication and a high level of professionalism.

### VOTEX™ Electronic Voting System

Every elector can vote in two simple steps :

- 1) The elector selects their desired candidates;
- 2) The elector casts their vote.

By using a VOTEX™ Electronic Voting Solution, you will combine the performance, reliability and efficiency of technology with an ergonomic, accessible, and easy to use elector voting interface that ensures confidentiality, security, accuracy and speed.

### VOTEX™ Election Management Software Package

The software package contains several components such as Electoral List Management, Polling Management, Results Management, an election information web portal for voters, and a secure web extranet that allows the election presidents and their teams to track and follow-up on the logistical aspects of the election process. The software package allows you to easily manage every phase of the electoral process from the planning of your election, through the electoral list revision process, identification and registration of electors at polling time, to the publication of the complete results and statistics on the election web portal - minutes after polls are closed. Our software solution ensures an accurate, secure and efficient management of your election and electoral list.

### Customized services

We will work closely with you every step of the way to ensure that your election runs smoothly and effectively. To accomplish our objectives we will provide proactive training, coordinate technical support and provide world class customer service before, during, and after the election. We will assist you through the whole process from start to finish.

The VOTEX™ family of products and services

# Electoral Technologies

## VOTEX™ Electoral Technologies

We provide electoral solutions for both the private and public sectors:

- elections;
- referendums;
- consultations;
- surveys;
- corporate elections;
- labour union elections;
- shareholder meetings.

## Customer comments

1. "It's so easy to use, [...] very little advertising was needed to inform electors on how to vote."
2. "All the benefits that we were promised were delivered..."
3. "The VOTEX™ Electronic Voting System worked perfectly without any anomalies."

## November 2005 Elections

- 20 municipalities contracted the VOTEX™ Electronic Voting System for their elections
- 16 municipalities used the VOTEX™ Electronic Voting System for their electoral process
- 4 municipalities did not use the system because the candidates won by acclamation
- Over 100,000 electors were processed
